CUTTING EDGE MANUFACTURING FOR INDUSTRY ON THE CUTTING EDGE: **PRODUCT REALIZATION**

Our CAD-CAM capabilities allow us to move from print to part with ease and accuracy. IMW reviews customer requirements to prepare manufacturing processes.

Our people will provide comprehensive design, programming and manufacturing services to meet project objectives to ensure customer satisfaction.

IMW specialize in developing process strategies, tooling requirements, and through our automation expertise create equipment from prototype concepts to volume production.

We strive to meet the needs and respond quickly to customers' requests for quotations and to establish appropriate delivery lead times to comply with scheduled delivery dates. We welcome the opportunity to react to customers' emergency needs. Completing a rush project over a weekend, or scheduling a last minute component for manufacture are standard practice at IMW.
